

FSX Burnisher

Battery Burnisher

With more areas in use 24 hours a day, seven days a week such as hospitals and retail environments, the need for round the clock cleaning has increased.

Daytime Cleaning

The Victor FSX Battery Burnisher has no trailing power leads allowing safe cleaning at any time of day and thanks to Victor's charging technology that delivers the ability to opportunity charge the machine.

Onboard Charger

The Victor FSX has an onboard charger so simply plug the machine into the nearest socket for charging without having to search for the right connecting cable.

Battery Protection System

Victor's unique battery protection system helps protect the machine in two ways. Firstly, it provides discharge protection preventing the battery from over discharging to prolong battery cycle life. Secondly, the charger detects when the battery is full to prevent overcharging and associated thermal problems.

Floating Pad Drive

The fully floating and flexible pad drive allows the machine to work with the contours of the floor for a consistent result.

Simple to use Pad Retainer Mechanism

The FSX Burnisher features the same pad retaining mechanism as the Lynx machine. No tool is required to change the pad simply twist off the pad retainer to remove the pad and screw back on to replace.

Passive Dust Collection System

The FSX features a passive vacuumation system that silently picks up dust created by the burnishing process as well as small debris on the floor.

Modular Design for Simple Servicing and Maintenance

The FSX has been designed to be serviced easily in the Victor tradition, with parts easily accessible and quick to change.

Delivering unrivalled productivity and performance the FSX Burnisher is a robust machine, perfect for the commercial cleaning environment.

The Floor Care People

The Victor FSX battery burnisher offers ultra speed burnishing, excellent battery performance and dust collection to leave your floors in fantastic condition.

The Victor FSX has no trailing power leads allowing safe cleaning at any time of day.

The on board charger and charging cable gives you the flexibility to charge the machine at your nearest socket.

The passive dust collection picks up dust and small debris without creating noise pollution.

The FSX also features an isolation key that operates as an extra layer of safety to prevent tampering or use by unauthorised personnel.

Applications

Hard floor burnishing

Advantages

Daytime cleaning

On board charger

AGM batteries for performance

Isolation key to prevent tampering

1350 rpm for a better finish

Robust design to cope with tough use

Product Code	Description	Voltage (V)	Run Time (hrs)	Charge Time (hrs)	Battery Capacity (Ah)	Rated Power (Watts)	Noise Level (dBA)	Pad Size (mm)	Pad Pressure (kg)	Weight with Batteries (kg)
VR-BB450	FSX Battery Burnisher	12	2	4.5	120	850	60	450	3	62.6
